Dear Bill, Read and appreciate time you
took for the undated letter awaiting me when I got back
from ~~Frisco~~ hospital. I reply when I can do what I must
(most time in bed + can move little) out of respect for your
sincerity. I used good 2 slides in 1966 used 8mm version then,
both also backward, saw some of what you refer to + was pretty
sure about large piece. However can't see no time for details, some
of what you are positive of is impossible, some else to it, some
at least questionable. As long as you say nothing will be done
will be done, you won't hurt your reputation and you
will have time for further consideration. I urge you to
make a sincere effort to demolish your own case, consider
all the arguments you can muster against it. Begin with
whether that picture really shows a 45 slug + if it could
have just popped out so clear + in such good condition...
Post Mortem has been printed + is on its way here. Does
Means or Wecht's new booklet, esp. on my wife. Tape
who include a label I can lick while lying down will
probably get faster service. So much for trouble with
low IV. Any time we specify insurance, which is makes the
mail price $10.75. While this is not high by today's stand-
ards, esp. not for so large a book and is a price that
does not permit recovery of all actual costs, it does
may discourage some sales.... Your certainty is a
typical symptom of a big pro which we all make
ummum. Time + passionate thought + learning
more about what is directly relevant + can limit are
helpful. Personally, I'd rather have you thinking, talking +
learning along the 223 lines. Prints + test, Hunt
